

WHAT KIND OF SEA TURTLE AM I?

1-877-TURTLE-3 www.savetheseaturtle.org

Dear Sea Turtle Enthusiasts:

This activity book is about different kinds of sea turtles.

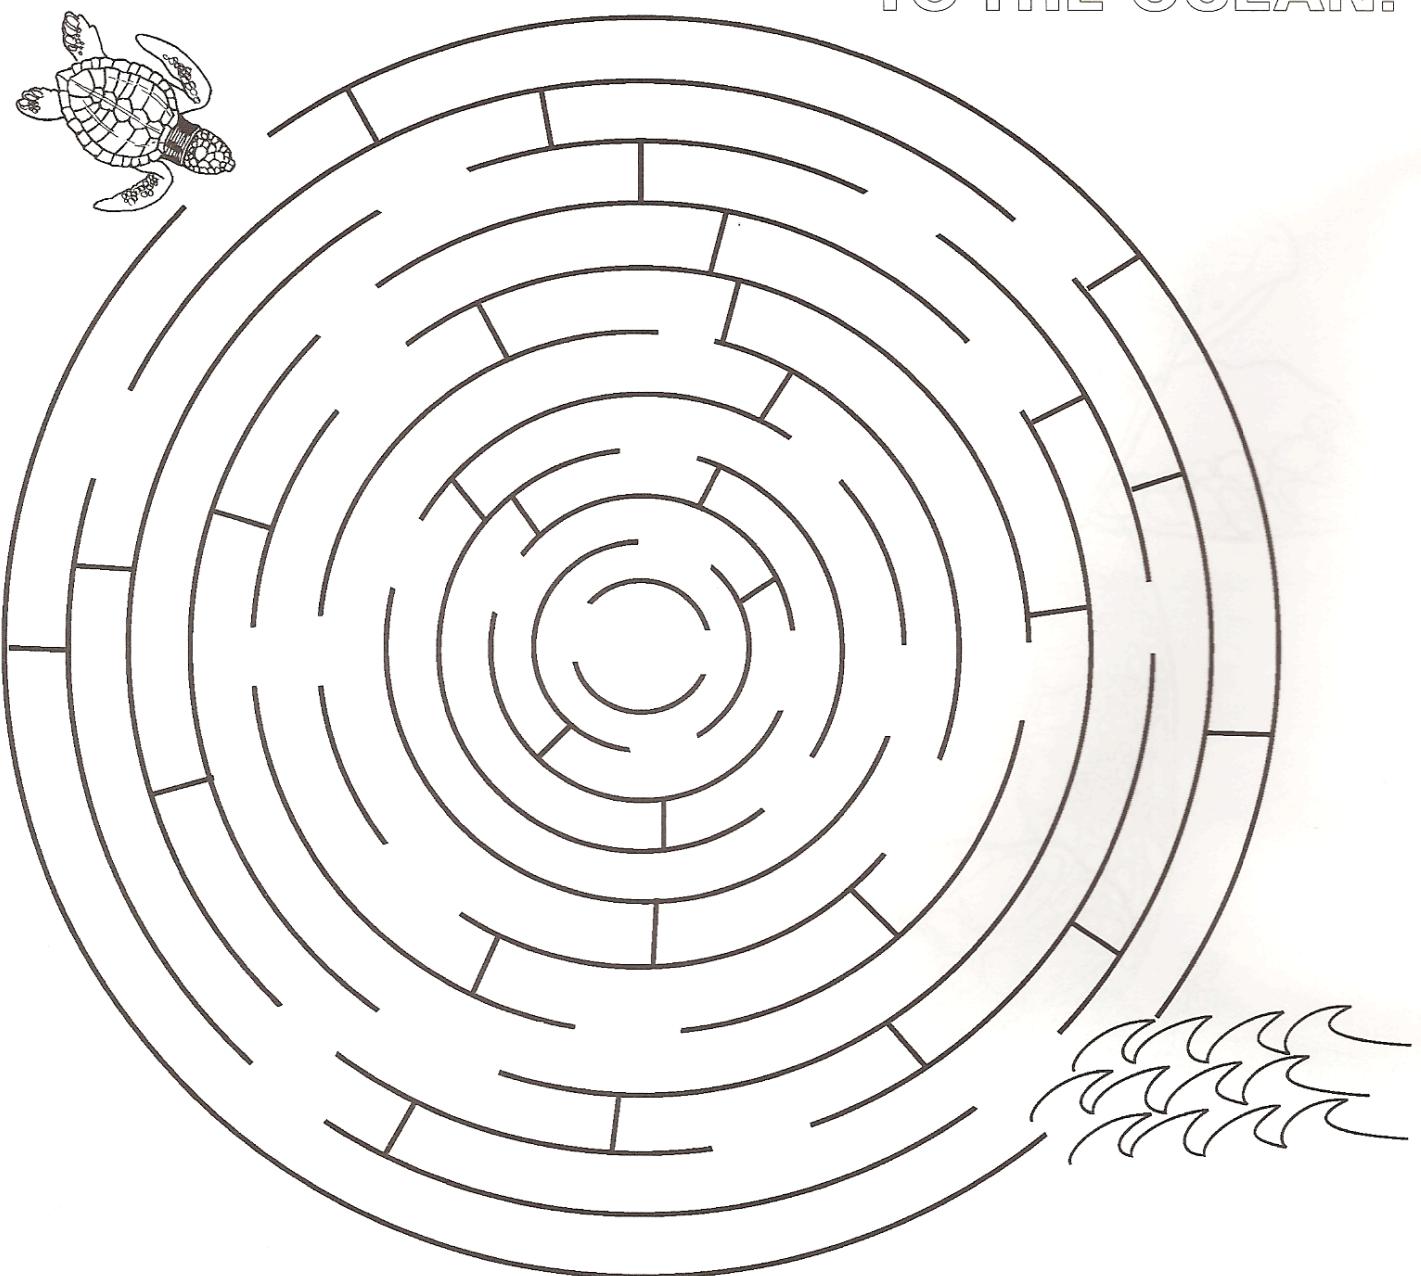

Sea Turtles are the largest reptiles living in the ocean today. They can dive very deep and swim long distances but they must breathe air to survive. During nesting season, the females must lay their eggs on the beach. They have been returning to the beaches where they were born for millions of years to nest.

Because of some fishing methods, the poaching of sea turtles eggs, and a host of other reasons, they are either endangered or threatened. Hopefully this activity book of fun facts will get children interested in these fascinating creatures that have evolved for more than 150 million years.

The National Save the Sea Turtle Foundation hopes that this activity book will inspire children to become interested in protecting marine life. Maybe participating in a shoreline cleanup activity as a family can heighten this interest even more!
